

Distributed Systems

COMP90015 2021 Semester 1
Tutorial 03

Q1. What is Thread?

Thread vs Process

Q3. What is life cycle of a thread?

Q4. What do you mean by synchronous access to shared resources and how can we achieve it?

Q5. Compare the worker pool multi-threading architecture with the thread-per-request architecture.

Code Demonstration

- Multi-threading in Java - Synchronization
- Multithreaded Server and client with Sockets
